SLIDING SHADING

ELVIAL created the sliding shading systems that will help you control natural light, and have it your way. Let both the light and shading system work for you.

ESSENCE

SD55

Wide openings in modern buildings glorify natural light that in its turn creates airy interiors, photogenic volumes, and elongated minimal lines. ELVIAL created the sliding shading systems that will help you control natural light, and have it your way. Let both the light and shading system work for you.

ATTENTION TO DETAIL

SOPHISTICATED & MINIMAL

You have designed a sleek project or have opted for a post modern style? Maintain the impression you want to create, even when the shading system is in use. The uniform 15mm profile and the hidden track configuration allow you to maintain the style, whether you choose the horizontal or vertical shading.

EXPANDING CHOICES

ESSENCE SD55 is the shading solution that will seriously upgrade the design of your project. With the reliable floor track, the uniform appearance of a 15mm profile and the option of horizontal or vertical shading ESSENCE SD55 will bring new life into the project.

MASTERFULLY MANUFACTURED

Creating the shading system that complies to the most demanding specifications of architectural design is another challenge ELVIAL rises to meet. With a vertical reinforcement of the horizontal shading and vice versa the ESSENCE SD55 can cover the maximum frame dimensions and maintain its top performance.

EXTRA FEATURES

EXCEPTIONALLY FUNCTIONAL

The hidden scroll mechanism is designed to bear a maximum sash weight up to 140kg and remain stainless. Your system is designed to sustain the most demanding use in demanding conditions.

COMFORT & EASE

It is sophisticated. It is minimal. It is also smart. Choose the electrically powered, remote controlled version of the ESSENCE SD55 sliding shading system and upgrade your experience.

PLAY WITH THE LIGHT

COMPATIBLE WITH THE ELVIAL
CLADDING SYSTEM

With the ESSENCE SD55 sliding shading system from ELVIAL you will love the light even in the summer months! The light we desire in the winter to improve heating performance, we try to avoid in the summer to improve cooling performance.

ELVIAL's ESSENCE SD55 system with the choice of horizontal or vertical shading allows you - depending on the orientation of the surface to be shaded - to reduce the temperature inside, create a more comfortable climate and save energy and air conditioning costs.
